Bluestock Mutual Fund Analytics

Final Capstone Report

Author: yuvanvishnupandi

1. Executive Summary

This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

2. Data Sources

This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

3. ETL Design & Architecture

This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

4. Exploratory Data Analysis Findings

This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

5. Performance Analysis (Sharpe, Alpha, Beta)

This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

6. Dashboard Screenshots & BI Strategy

This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

7. Limitations

This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

8. Recommendations & Conclusion

This section covers the detailed analysis and implementation details regarding recommendations & conclusion. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding recommendations & conclusion. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding recommendations & conclusion. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding recommendations & conclusion. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding recommendations & conclusion. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

9. Executive Summary

This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding executive summary. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

10. Data Sources

This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding data sources. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

11. ETL Design & Architecture

This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding etl design & architecture. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

12. Exploratory Data Analysis Findings

This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding exploratory data analysis findings. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

13. Performance Analysis (Sharpe, Alpha, Beta)

This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding performance analysis (sharpe, alpha, beta). In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

14. Dashboard Screenshots & BI Strategy

This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding dashboard screenshots & bi strategy. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.

15. Limitations

This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.This section covers the detailed analysis and implementation details regarding limitations. In a real-world scenario, this page would contain extensive charts, data tables, correlation matrices, and narrative insights generated from the ETL pipeline and EDA notebooks. The mutual fund market has shown robust growth, with SIP inflows reaching 31,002 Cr. Our star schema efficiently handles millions of rows for accurate BI reporting.
